Model 10 3.0 Rehabilitation Outcomes Summary

ADAPTATION > COMPENSATION > RESTORATION

Rehabilitation outcomes are assessed on a 10-point rating scale. 10 is the most independent level of ability, and 1 is the most dependent level of ability. A score of 0 may represent an inability to perform the task. The Model 10 Composite Score represents the functional improvement of the 11 patients who completed a rehabilitation stay from 2/1/2024 to 3/29/2024.

Functional Outcome Level Upon Admission	5.1
Functional Outcome Level Upon Discharge	7.5

Rehabilitation outcomes demonstrate progression towards discharge goals.

Functional improvement is displayed by the percent of functional gain at discharge compared to admission.
